MT Højgaard selected as design and build contractor for the urban development of Vinge close to Frederikssund

Enclosed please find MT Højgaard announcement of 23 June 2017 regarding that MT Højgaard has been selected as design and build contractor for the urban development of Vinge close to Frederikssund.

For 2017, in addition to our share of 54% in the MT Højgaard group's profit after tax and minority interests, the Højgaard Holding group still expects a small positive result before tax.

The projections concerning future financial performance are subject to uncertainties and risks that may result in a development that deviates substantially from what is expected.

Best regards,
Højgaard Holding A/S

Ditlev Fløistrup
CEO

Press release

23 June 2017

MT Højgaard selected as design and build contractor for the urban development of Vinge close to Frederikssund

The Local Authority of Frederikssund has initiated the development of Vinge town centre. Together with AP Ejendomme, MT Højgaard has been selected to develop the area being responsible as design and build contractor for infrastructure, train station, public-private partnership project, etc. and for the construction of social housing for the building society Domea. The conditional construction contracts have a total value of DKK 590 million.

The urban development project Vinge is situated east of Frederikssund. The town centre will be built in two stages and includes buildings totalling 183.860 square metres. The infrastructure projects include ground levelling, bridges, roads and paths as well as waste water.

AP Ejendomme leads the public-private partnership as employer, whereas infrastructure projects and the train station will be built for the Local Authority of Frederikssund, Frederikssund Waste Water Treatment Plant and the Danish Ministry of Transport, Building and Housing. Finally, Domea Building Society is the employer on the project to build social housing with a floorspace of 10,000 square metres.

- The town Vinge is one of Denmark's largest urban development projects with a total area of 370 hectare, and we look forward to working together with the Local Authority of Frederikssund, AP Ejendomme and other parties on this project. The project gives us the opportunity to involve MT Højgaard's strong competencies at an early stage and, together with the other project parties, come up with and incorporate the most attractive solutions for the citizens of Vinge to live and work in, says Executive Vice President at MT Højgaard, Jesper Nordby.

Because of the complexity of the urban development project, all contracts between the Local Authority of Frederikssund, AP Ejendomme and MT Højgaard are conditional on factors which primarily concern the overall framework for the urban development. These factors are to be clarified over the coming period.

The initial works are expected to begin in September 2017, and handover is expected to take place in March 2021.

The project will have a positive impact on MTH GROUP's revenue and profit for 2017 and onwards, but will not lead to any changes in the previously published forecasts of the financial performance in 2017.

Expectations to the future financial trends are by nature associated with risks and factors of uncertainty, which may cause the actual development to deviate substantially from expectations.
